

INDICE

COMITATO ORDINATORE	Pag.	3
PROGRAMMA	»	5
P. CORRADINI – Opening Remarks	»	7
I. PASQUON – Welcome Address	»	11
H.-H. BRINTZINGER – Catalyst Models and the Evolution of <i>Ansa</i> -Metallocene Catalysts for the Stereoselective Polymerisation of α -Olefins	»	13
G. GUERRA – Impact of Natta's Discoveries on Industry and Uses of PP in Every Day's Life	»	27
P. GALLI, G. VECCELLIO – Polypropylene Technology: a Revolutionary Development, Unique in the History of Polymer Materials	»	37
L. RESCONI – Control over the Echainment Modes of Propylene: from Stiff Plastic to Soft Elastic Polypropylene	»	69
G. FINK – Some Insights into Molecular Mechanistic Details of Stereospecifically Working Catalysts	»	85
W. KAMINSKY – New Polymeric Materials by Metallocenic Catalysis	»	101
B. LOTZ – Solving the Crystal Structures of Isotactic Polypropylene: a Tale of Nightmares, Frustration and Beauty	»	107
G. ALLEGRA – Chain Mobility in Non-Stereoregular and Stereoregular Polymers	»	143
P. CORRADINI – Concluding Remarks	»	155

TAVOLA ROTONDA
 PERSONAL AND/OR HISTORICAL NOTATIONS RELATED TO
 NATTA'S DISCOVERY OF STEREOREGULAR POLYMERS

Interventi di

F. MINISCI	»	159
G. BIARDI	»	161
G. MAZZANTI	»	165

P. CORRADINI	Pag.	173
L. PORRI	»	187
I. PASQUON	»	193
A. ZAMBELLI	»	201
E. ALBIZZATI	»	203
F. CALDERAZZO	»	205
L. CASSAR	»	209
